### Web Page Design Assignment

Point Value **50** points

Here is the list of features required for your web page design exercise. The theme or topic of the web page may be of your choice. However, make sure that you use materials that are *appropriate for a class assignment*. It would probably be a good idea to consult the materials that we covered and printed in class for reference. Have fun!

1. Your **name** should appear somewhere on the page. (5 points)
2. The web page should have at least **two paragraphs** of text and one major heading in a different font size. (10 points)
3. This web page should have at least **one graphic** included in it. (*Procedures for downloading graphics and inserting them into a web page were covered in class for instructional purposes only*). Graphics can be obtained from the Internet, but, remember that such graphics are protected by copyright law(s). Do not use your graphic on the Web without the permission of the owner. (5 points)
4. There should be **links to at least two different Web sites**. You can use different types if you like (EX: http:// ftp:// local links, etc.) however, two of them must be to Internet URLs. (5 points)
5. You must have a **link to your email address** on your web page (if you do not have email then you may use the example that we used in class). (5 points) (EX: mailto:)
6. Put a **timestamp** (EX: this page last modified on...) on your web page. (5 points)
7. You need to choose appropriate color scheme **background color, text color, link color, and visited link color**. (5 points)
8. **Print** your HTML code from **Notepad** so I can grade your code and HTML tags properly. (5 points)
9. **Print** your Page from an **Internet Browser** so I can grade your web design layout properly. (5 points)

[NOTE: if you would like to leave me your disk with your files on it that is acceptable. However, you will lose the points for the two prints. With the above prints, I should be able to grade this entire assignment]
